

The scientific way to study

We are delighted to be able to announce that all new Year 9 students will be given a Science Tassomai account. Tassomai is a subscription only online learning system funded by the school and designed to improve students' retrieval of knowledge. Importantly Tassomai also helps students learn new or missed Science content by repeatedly quizzing topics until students knowledge is secure. Tassomai remembers what students know and revisits topics and questions where improvement can be achieved. Year 9, 10 and 11 students are already signed up and using this platform. The idea is for students to try every question and trust the programme to keep repeating questions over time until students are confident in all aspects of their sciences. It is ok to not know answers and take a guess that is how it works. The only thing students need to do is to use the Tassomai app for about 15 minutes every day and Tassomai will do the rest. For just 15 minutes a day students will improving all three GCSE Science grades. Biology, Chemistry and Physics.

This 3 minute video will give you a good overview of how Tassomai works for your child. All students will be made familiar of how it all works; the video is for you to see what they do every day.

Weekly Parent update via email

You will receive an email directly from Tassomai inviting to you sign up to your account. This will enable you to see how well your child is engaging. Each week Tassomai will send you a summary email so you will not need to keep logging to check on their progress.

If you have any problems with your child's Tassomai account, please encourage them to ask their class teacher about it first.

Kind regards

Mr M Haynes
